THE REPLY FILED 1-29-10 FAILS TO PLACE THIS APPLICAT	ION IN CONDITION FOR ALLOW	ANCE.							
The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 3 T CFR 4.1.31; or (3) a Request for Continued Examination (RCE) in compliance with 3 T CFR 1.114. The reply must be filed within one of the following time periods:									
a) The period for reply expires 5 months from the mailing date	of the final rejection.								
The period for reply expires on: (1) the mailing date of this Ac no event, however, will the statutory period for reply expire la Examiner Note: If box 1 is checked, check either box (a) or (the MONTHS OF THE FINAL REJECTION. See MPEP 766.07(f).	ter than SIX MONTHS from the mailing b). ONLY CHECK BOX (b) WHEN THE	date of the final rejectio	n.						
Extensions of time may be obtained under 37 CFR 1.138(a). The date on which the petition under 37 CFR 1.138(a) and the appropriate extension fee have been filled is the date for purposes of determining the period of extension and the corresponding amount of the fee. The proprietal extension flee have been filled is the date for purposes of determining the period of extension and the corresponding amount of the fee. The second of the corresponding amount of the fee. The second is extensionable to the corresponding amount of the fee. The second is extensionable to the shortened statutory period for reply originally set in the final Office action; or (2) a set for thin (b) above, if checked. Any reply reserved by the Office later than three months after the mailing date of the final rejection, even if timely filed may reduce any semed patent term adjustment. See 37 CFR 1,704(b). NOTICE OF APPEAL									
 The Notice of Appeal was filed on 3/1/10. A brief in compl filing the Notice of Appeal (37 CFR 41.37(a)), or any exten Notice of Appeal has been filed, any reply must be filed wi 	sion thereof (37 CFR 41.37(e)), to	avoid dismissal of the

Supervisory Patent Examiner, Art Unit 1794

/Keith D. Hendricks/

Continuation of # 11: The request for reconsideration is not persuasive because: Applicant states that the reference(s) refer to soy protein hydrolysates, which applicant asserts are peptides and amino acids, not proteins. Applicant also states that their protein composition is not subjected to an enzyme, at page 2 of the response: "It being noted that this disclosure falls to mention anything about using an enzyme (such as the pepsin referred to above from the Blake et al. reference) in producing the acid-soluble soybean protein." Thus applicant argues that the references do not teach or suggest the invention.

The rejection is maintained for the reasons of record, which are incorporated as cited in a previous Office action. Regarding the references teaching a protein (vs. peptides), reference is made to primary reference Blake et al., where the examples specifically teach the use of a commercially-available water-soluble soy protein hydrolysate Gunther D-100 WA which comprises "(62% protein, 16% carbohydrate, 24% moisture)". This clearly indicates that the composition contains the acid stable & soluble (see col. 5) protein as required by the instant claims.

Furthermore, applicant does not address the teachings of the Bradford et al. patent, which clearly demonstrates the use of proteins treated to remove or inactivate a polyanionic substance (phytic acid), where the proteins are also acid soluble, as required by the claims

It is noted that the instant claims do not exclude enzymatically-processed protein preparations. It is further noted that simply because a protein composition is subjected to hydrohysis, this does not exclude the presence of proteins in the final product; the particular conditions of the reaction idicate the amount and extent of hydrohysis.

Further, to address applicant's comment for the record regarding enzymatic treatment of the protein, it is noted that applicant's own protein preparation is subjected to enzymatic treatment as shown in Example 1 on page 23 of the spaciation. While this enzyme is a phytase and not a protease, it serves to demonstrate that applicant's statement at page 2 of the response is not persuasive regarding the use of enzymes.
